PROFESSIONAL SUMMARY

Passionate and detail-oriented Frontend Developer with hands-on experience in building responsive and user-friendly web applications using modern web technologies like React.js, JavaScript, HTML5, and CSS3. Skilled in creating dynamic UI/UX designs, optimizing performance, and ensuring cross-browser compatibility. Excited to contribute to collaborative team environments, solve problems, and deliver innovative solutions that enhance user experience and drive business outcomes.

TECHNICAL SKILLS

- Programming Language: JavaScript (ES6+), HTML5, CSS3
- Libraries/Frameworks: React.js, Redux, Bootstrap
- Tools/Platforms: Visual Studio Code

PROJECTS

Movies Review :

- Developed a Movie Review App that allows users to search for movies, view detailed information Integrated third party API (OMDB API) to fetch real-time movie data, including movie details, posters, cast, release dates, and ratings .
- Engineered a dynamic and responsive user interface using React.js, ensuring smooth and efficient navigation across pages using React Router, with optimized layouts for both desktop and mobile devices.

Personal Portfolio :

- Implemented a visually dynamic, interactive personal portfolio website with unique features such as an eye-follow cursor effect, parallax tilt animation, and custom cursor animations. The site is designed to highlight my skills and projects in an engaging way.
- The portfolio was built using React to create a smooth, single-page application (SPA), with JavaScript for interactive functionality, including mouse-tracking effects, and dynamic scrolling behavior and uses CSS3 animations providing a visually rich experience.

Food Delivery App :

- Designed a food delivery app with an interactive cart system, enabling users to easily add, remove, and adjust items with automatic price updates for a seamless shopping experience. Ensured the app was fully responsive for optimal performance across all devices.
- Implemented core features including search functionality, infinite scrolling, pagination, Bootstrap carousel for featured items, and React Hot Toast notifications for real-time updates. Also developed secure login with local storage and displayed order history after a successful purchase.

EDUCATION

University of Mumbai
Bachelor of Science Information Technology   Mumbai, India
CGPA : 7.8   2021 - 2024

SOFT SKILLS

- Problem-Solving: Ability to debug issues and optimize code for better performance.
- Creative Thinking: Creative and innovative, thinking outside the box to enhance user interfaces.
- Adaptability: Quickly learning new technologies and adjusting to fast-paced development environments.
